DOCKET FILE COPY ORIGINAL

Re: FCC Proceeding 02-278

I am writing to file a complaint about the number of unsolicited faxes our business receives on a regular basis. We feel this is a waste of our resources and time. Our wish is that business would truly have to have an established business relationship before sending faxes and have a service similar to the National Do Not Call list for fax numbers as well.

I have included a sample of the unsolicited faxes that we received in our office during the month of May 2005.

Thank you.

A handwritten signature in cursive script that reads "Chris Kassube".

The Nanotech Report

******Urgent Investment Alert******

Wednesday May 18 2005

Stock Symbol	OTCBB: NCSH
Shares outstanding (est)	48,000,000
Float (estimate)	1,500,000
Current Price	\$2.30
Price Trend	Upward
Risk Rating	<u>LOW</u>

Congratulations to investors who followed our previous recommendations! You've realized gains of 350 - 600%!

Today's Recommendation: Nano Chemical Systems Holdings, Inc (NASDAQ Symbol NCSH) is a ground floor opportunity for savvy investors to see 350% returns or more! NCSH is poised to explode!

The Nanotech Investment Sector

Nanotechnology is the best performing sector in the market today. On average, nanotech stocks are up over 200% during the last 12 months alone. The National Science Foundation estimates that the nanotechnology market will be worth \$1 trillion annually by 2015, making it one of the largest industries in the world, rivaling telecom and healthcare. Global investment in nanotech R&D has topped \$4.7 billion in 2004 and President Bush has set aside \$1 billion for nanotech development in his 2005 budget.

Respected market guru Steve Forbes has stated, "Some of the early-stage byproducts of nanotech research are already yielding huge profits for savvy investors." In a recent Fortune Magazine article Nicholas Varchaver noted, "Nanotech has electrified the investing world." There is no doubt that the nanotech sector is the next rapid growth, high yield investment opportunity.

Recent Company News:

Nano Chemical Systems Holdings, Inc. announces that Professor Dr. David Tomanek has joined the Board of Directors on March 15, 2005.

Dr. Tomanek has been consulting on Nanotechnology related topics for companies such as Xerox, DuPont, Toray, Samsung, NEC and Terastore.

Nano Chemical Systems Holdings, Inc. announces that the Company has acquired aerosol manufacturing, technical and other assets from GreenTree Spray Technologies, LLC. GreenTree is an aerosol manufacturing company located in Seaford Delaware with approximately \$2,000,000 in annual sales and a 40,000 square foot leased facility including office, laboratory and production area.

Nano Chemical Systems Holdings, Inc. announces the acquisition of two Patents Pending for Nano Technology inventions. The patent applications are titled "Preservation of

Don't Miss This 350% Gain!

NCSH Investors have realized a 38% per month gain! Should this upward trend continue savvy investors could see gains of 350% or more! Other Nanotech stocks are trading at \$22-\$28!

Narrow Nano-Size Distribution of Particles" and "Semiconductive Nanoparticulates Enhanced Surface Appearance."

About The Company

Nano Chemical Systems Holdings, Inc. has certain patent applications related to nanostructured TiO2. The Company intends to use this patented technology for the research, testing and eventual manufacture of aerosol products for the protection of textile from UV radiation.

Nano Chemical Systems has solid patents pending and a manufacturing and production facility, which can translate into very profitable product lines. NCSH is very undervalued right now.

Investment Considerations

The nanotech sector is at a point in time similar to information technology in the early 80's when putting \$1000 into a company like Microsoft could have realized \$500,000 in return today. Even a small investment in nanotech can yield huge returns.

NCSH investors have realized a 38% per month gain! Should this upward trend continue savvy investors could see gains of 350% or more! Other Nanotech stocks are trading at \$22-\$28!

**Take the advice recently given in Forbes Magazine
"Don't miss the nanotech revolution!"**

Reasons To Own NCSH:

- 1) NCSH investors have realized a 38% per month gain! Should this upward trend continue savvy investors could see gains of 350% or more!
- 2) The nanotech sector is at a point in time similar to information technology in the early 80's when putting \$1000 into a company like Microsoft could have realized \$500,000 in return today.
- 3) NCSH is very undervalued right now with similar companies trading in the \$22 to \$28 range. With a very tight public float NCSH is poised to explode!

Don't miss this 350% gain!!
